ONGOING RESEARCHES

Comparison between different doses of intravenous dexmedetomidine for ease of intubation and maintenance of anaesthesia without muscle relaxant in carcinoma breast patients undergoing modified radical mastectomy.

Comparison of fresh gas flows for optimal oxygenation and ventilation in robot assisted lower abdominal oncosurgeries

Intranasal Dexmedetomidine as premedicant for patients with Head & Neck cancers undergoing Direct laryngoscopic evaluation : a prospective randomized study

Analysis Of factors associated with difficult intubation in oral cancer surgery - a prospective randomized study

Effect of Intravenous Vitamin C and N Acetyl Cysteine on Postoperative Pain and Opioid Consumption after Laparoscopic Gynaecologic Oncology Surgery: A Comparative Randomized Controlled Trial.

Effect of Intravenous Dexmedetomidine and Propofol Infusion for Tubeless Intravenous Anaesthesia for Microlaryngoscopy Procedures in Head and Neck Surgeries Anaesthetic management of Juvenile Nasopharyngeal Angiofibroma: Our experience in the last Decade

Does Robot Assisted Lower abdominal oncological surgeries affect the determinants of early extubation: our early experience

Does Pre operative multimedia video allay anxiety in oncoanaesthesia?

Efficacy of Intraperitoneal Instillation Of Ropivacaine VS Placebo For Post Operative Analgesia in Laparoscopic Gynaecological Cancer Surgeries- A Prospective Randomised Controlled Study

Airway Management in Oral Oncosurgeries - A Prospective Observational Study

Use of Virtual Endoscopy in Airway Management of Head & neck Onco surgeries
