

Title : A Comprehensive Overview of Staphylococcus aureus Isolates from Cancer Patients

Author Name : Dr B G Sumathi

CO Author Name : Vijay C R

Publication : Research Paper

Department : Department of Microbiology

Asbtract :

S.aureus was the most common gram positive bacteria isolated and gram negative infections was more common than gram positive infections as analysed from infections in cancer patients at our regional referral hospital. Demographic and epidemiological changing pattern of bacterial strains in cancer patients need to be updated frequently.
